

COMPUTER RESOURCES AND DATA MANAGEMENT

The purpose of this policy is to address the varied uses of computer resources in the school district. The Board of Education recognizes that computers are a powerful and valuable education and research tool and as such are an important part of the instructional program. In addition, the district depends upon computers as an integral part of administering and managing the schools' resources, including the compilation of data and recordkeeping for personnel, students, finances, supplies and materials. This policy outlines the Boards expectations in regard to these different aspects of the district's computer resources.

General Provisions

The Superintendent shall be responsible for designating a Coordinator of Instructional Technology who will oversee the use of district computer resources. The Coordinator of Instructional Technology will prepare in-service programs for the training and development of district staff in computer skills, appropriate use of computers and for the incorporation of computer use in subject areas.

The Superintendent, working in conjunction with the designated purchasing agent for the district, and/or the Superintendent's designee, will be responsible for the purchase and distribution of computer software and hardware throughout the schools. They shall prepare and submit for the Board's approval a comprehensive multi-year technology plan which shall be revised as necessary to reflect changing technology and/or district needs.

The Superintendent, working with the Superintendent's designee, shall establish regulations governing the use and security of the district's computer resources. The security and integrity of the district computer network and data is a serious concern to the Board and the district will make every reasonable effort to maintain the security of the system. All users of the district's computer resources shall comply with this policy and regulation, as well as the district's Computer Network for Education (4526). Failure to comply may result in disciplinary action, as well as suspension and/or revocation of computer access privileges.

All users of the district's computer resources must understand that use is a privilege, not a right, and that use entails responsibility. Users of the district's computer network must not expect, nor does the district guarantee, privacy for electronic mail (e-mail) or any use of the district's computer network. The district reserves the right to access and view any material stored on district equipment or any material used in conjunction with the district's computer network.

Management of Computer Records

The Board recognizes that since district data is managed by computer, it is critical to exercise appropriate control over computer records, including financial, personnel and student information. The Superintendent, working with the his designee and the district's business official, shall establish regulations and procedures governing management of computer records.

The regulations will address:

- passwords,
- system administration
- separation of duties,
- remote access,
- data back-up (including archiving of e-mail); and,
- disaster recover plans.

Review and Dissemination

Since computer technology is a rapidly changing area, it is important that this policy be reviewed periodically by the Board and the district's external auditor. The regulation governing appropriate computer use will be distributed annually to staff and students and will be included in both employee and student handbooks.
